Specialized in a wide range of OE diesel fuel injection parts for BOSCH, ZEXEL, DENSO, DELPHI, STANADYNE, MOTORPAL, CONTINENTAL (SIEMENS) and AMBAC.

The Challenge & solution

Client was having an Older iDempiere 360 version based ERP solution in their branches. They were having troublesome in managing their newer and enhanced levels of MIS report generations. For getting new and updated forms and functions, they require assistance from a prospective consultant where in new features can be adopted and make the system much for feature rich and customize based on their requirements.

SODTECH using Open source iDempiere ERP has given taken this challenge and came up with a fully customizable solution towards the client. SODTECH decided to venture outside its domain of application development, and acted as a guide for the client providing consultation and best approach to roll out their process much smarter and error free. SODTECH with iDempiere ERP, an open source solution, is not tied by any licensing cost for functional changes or version upgrade.

As a solution provider, SODTECH have upgraded their MIS report engine to get reports based on their current requirement and troubleshooting their existing system to make things work on their current challenge. The current MIS report engine satisfies their operations and brought more transparency in their day-to-day working procedures.

Overall the new system has helped client to build a strong base to concentrate and plan on new avenues for growth. In short, a system prepared for the organization for growth by infusing it with more operational agility and flexibility.
